Empathy Map

The Empathy Map helps in understanding the needs, thoughts, feelings, and actions of users affected by flood disasters. It enables the development of a user-centric flood prediction system that provides timely alerts.

SAYS • "We need accurate flood predictions before heavy rainfall." • "Early warnings can help save lives and reduce property damage." • "The system should provide easy-to-understand flood alerts." •	THINKS • "Can this prediction model provide reliable results?" • "How can we reduce flood-related risks in vulnerable areas?" • "Real-time weather and river-level data will improve prediction accuracy."
PERSONA NAME <i>District Disaster Management Officer (DDMO)</i>	
DOES • • Monitors rainfall and river water levels regularly. • Issues emergency alerts and evacuation instructions during flood risks. • Coordinates with disaster response	FEELS • Concerned about protecting people and infrastructure from floods. • Responsible for providing timely and accurate disaster warnings. • Confident when reliable AI-based flood prediction supports decision-making.
