Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Checks weather forecasts. - Monitors rainfall and river updates. - Opens the flood prediction application.	- Receives AI-based flood risk prediction. - Reads warning notifications. - Checks flood risk level on the dashboard.	- Moves family to a safe place. - Protects important belongings. - Follows evacuation instructions.
Touchpoint <i>What part of the service do they interact with?</i>	- Mobile App - Weather Information - Dashboard	- AI Prediction System - SMS/Mobile Notifications - Flood Risk Dashboard	- Emergency Alert System - Local Disaster Management Team - Safe Shelter Information
Customer Thought <i>What is the customer thinking?</i>	"Will there be a flood today?" "Is the information accurate?" "Should I prepare now?"	"How serious is the flood risk?" "Should I leave immediately?" "Can I trust this prediction?"	"My family is safe." "I hope the flood damage is minimal." "The early warning helped us."

Customer Feeling <i>What is the customer feeling?</i>	Curious, Concerned, Alert	Worried, Cautious, Hopeful	Safe, Relieved, Thankful
---	---------------------------	----------------------------	--------------------------

Process Ownership <i>Who is in the lead on this?</i>	Weather Data Providers & System Administrator	AI/ML Prediction Engine & Disaster Management Team	Emergency Response Team & Local Authorities
Opportunities <i>How can we improve this stage?</i>	● Use real-time weather APIs. ● Improve data accuracy. ● Provide user-friendly dashboards.	● Increase prediction accuracy. ● Send multilingual alerts. ● Reduce notification delay.	● Suggest nearest safe shelters. ● Provide live evacuation routes. ● Collect user feedback for future improvements.
